Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 October 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

The disclosure is objected to because of the following informalities: Note typographical errors: For Example Only: (1). Moveable" in claims 1 & 9, lines 1, respectively ; and (2). a comma is missing between "bottom wall" and "sidewalls" in claim 1, line 5.

Appropriate correction is required.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The negative proviso "but not vaporize the heat transfer liquid" in claim 1 is not found in the specification. If support can be pointed-out, at least the specification fails to provide proper antecedent basis for the above negative proviso as it is not positively recited in the specification.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1764

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Van Kouwenberg et al (5,582,680) in view of Salmon (5,348,623).

The above references are applied for the same combined reasons as set forth at the paragraph bridging pages 2 and 3 of the previous Office action dated September 24, 2002.

Claims 6 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Van Kouwenberg et al in view of Salmon as applied to claims 1-4 above, and further in view of Cress et al.

Cress et al is applied for the same reasons as set forth at page 4, second full paragraph of the previous Office action dated 09/24/02.

Claims 5, 8, and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 10 is allowable over the prior art of record.

Applicant's arguments filed on August 19, 2003 have been fully considered but they are not persuasive.

Applicant's following arguments such as: "...Whereas Salmon uses an evaporable liquid to heat water..., Salmon does not use such a liquid to distill the water, but rather creates the steam by inserting a heating element into the water being distilled. As such, Applicant would submit that without knowledge of the present invention, Salmon would

not have been combined with Van Kouwenberg '680 to teach the present invention as now claimed in Claim 1.." are not considered well-taken.

However, the manner or method to which an apparatus is to be put is not germane to the issue of patentability of the apparatus itself. Applicant fails to delineate the elements or structures not shown nor render obvious by the prior art. The apparatus of the prior art is deemed capable of performing similar function(s) as claimed. Absent evidence to the contrary the prima facie case of obviousness is deemed to be reasonably established by the prior art and has not been rebutted.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Virginia Manoharan whose telephone number is (571) 272-1450.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn Caldarola can be reached on (571) 272-1444. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
